

T. Krishnan is the Vice President of Technology at Lyka Enterprises, Inc. Krishnan manages the global technology services, professional services, NOC operations and is responsible for services strategies. Mr. Krishnan has designed and implemented next-generation network and IPTV solutions for several clients and was instrumental in design, implementation and support VOIP solutions for major carriers around the world.

Prior to Lyka, Krishnan was with 3Com Corporation responsible for global professional services and support. He was instrumental in designing a global escalation team and process and provides follow-the-sun/round-the-clock services. Mr. Krishnan is tech savvy manager with an aptitude to implement creative solutions for clients. He has a Master's degree in Computer Science from Illinois State University and an MBA in Technical Management from University of Phoenix.

At Lyka we believe in using technology to solve complex problems and building simple solutions. Our solutions provide vision and clarity to your services, we build solutions that manage and protect your data. As Mr. Krishnan always says "You cannot manage and protect what you cannot see" and at Lyka our goal is to see – Create vision based from your data, systems and build solutions to manage it.
